

Mortise lock, profile cylinder
With two backsets

2

The lock is particularly suitable for doors that are supposed to close as tightly as possible. Direct connection with the door leaf needs to be avoided. The two consecutive backsets allow the use of half fitting sets and single cylinders. Only drillings that do not penetrate the door leaf and are not positioned on one axis are required on each side of the door.

- Area of application: For rebated wooden doors, suitable for radiation protection doors, test rooms, directors' rooms, consulting rooms etc.
- Material: Forend: Stainless steel, latchbolt, deadbolt and lock case: Steel, lever follower: Malleable cast
- Closure: Prepared for profile cylinder
- Deadbolt: 1-turn
- Version: Without key action, with two backsets
- Forend: Round
- Lever follower: 8 mm
- Distance B: 72 mm

Forend width mm	Mounting	Stainless steel, matt
Backset A 40/80 mm
