

PinLock Combination lock

Keypad and rotating lever

Espagnolette lock

PinLock is a solution for schools, wellness centres, sports facilities, staff rooms, etc. where secure keyless locker solutions are required.

The advantage is that there is no need to issue keys which can be lost. A continuous battery monitoring facility indicates a low battery (warning light).

The lock is locked by entering a variable four-digit PIN code and operating the rotating lever. The lock is unlocked again by re-entering the four-digit PIN code and operating the rotating lever.

A six-digit master code can be used to open the door (emergency opening) if the PIN code is forgotten. The combination lock is blocked for 15 minutes if the wrong PIN code is entered 3 times.

- Material: Housing: Plastic, deadbolt: Stainless steel
- Finish: Housing: Black
- Locking system: Electronically secured deadbolt lock with apertures for 6 mm profile rods (espagnolette lock)
- Dim. (W x D x H): 60 x 140 x 24 mm
